

# Jordan Ellis

## Cloud Engineer / DevOps Engineer

jordan.ellis@example.com | +1 (555) 010-0142 | Springfield (fictional)

### SUMMARY

Cloud and DevOps engineer with 7 years of experience designing, securing and operating cloud infrastructure for production workloads. Looking to step up to a Cloud Architect role.

### SKILLS

Cloud: AWS, Azure, Cloud Architecture, Cloud Security, Cloud Migration

Infrastructure: Terraform, Ansible, Infrastructure as Code, Kubernetes, Docker, Linux, Networking

Automation: Python, Bash, Git, Jenkins, CI/CD, GitHub

### EXPERIENCE

#### Senior Cloud Engineer - Northwind Cloud Labs (fictional) | Mar 2022 - Present

- Designed multi-account AWS cloud infrastructure with landing-zone guardrails and centralised logging.
- Provisioned environments with HashiCorp Terraform so that every change is reviewed as infrastructure as code.
- Run container orchestration on K8s clusters and build Docker images in Jenkins pipelines.
- Led the migration of 40 services from on-premises data centres to Azure and AWS.

#### DevOps Engineer - Contoso Systems (fictional) | Jan 2019 - Feb 2022

- Automated server configuration with Ansible and Python; managed Linux fleets and network segmentation.
- Introduced CI/CD with Git and Jenkins, cutting release time from days to hours.

### EDUCATION

B.Sc. Computer Science - Springfield State University (fictional), 2018

### CERTIFICATIONS

AWS Certified Solutions Architect - Associate (demo entry)

HashiCorp Certified: Terraform Associate (demo entry)
